Client:
Terateng High School
Contacts: +266 63232133
Email: wirewire01@gmail.com
Background:
Terateng High School has a library where students borrow books for a period of 28 days to read. If a student does not return the book within the 28 days period , a M5.00 fine is payed by the student each day after the 28 days. The librarian is administers the whole operation. The librarian issues books to students, adds books to the school system, can add or delete student to the library school system.
Currently the library system in operation is that of recording all the operations using an exercise book to record all the operations of the library. This is challenging as it requires a lot of work and resources, this slows down the operations of the library as more student have lately been eager to use the library than in previous years.
The board of Terateng has requested A++ Team to develop an digital library management system for them to assist the librarian in doing the library operations.
